SCM GROUP CLASSICAL LINE MACHINES

SCM GROUP USA offers a wide range of their classical line of machines: jointers, planers, sliding table saws, shapers, routers, and boring machines.

SLIDING TABLE SAW

The first 10' stroke model offered is basic on features, and heavy on quality and reliability. This 12" blade saw is designed to be an economic solution for the small shop yet it includes high-end construction features, ensuring a long operating life.

SI 300 Nova

Other Sliding Table Saws Include: SI 300 S Nova, SI 400 Digital Nova, S 400 EP3 Nova, SI 300 Series, SI 400 Series and SI 400 Vanguard

JOINTERS

The 1,653 pound SCMI F 410 NOVA 16" jointer is distinguished by its high degree of safety and reliability over time.

F 410 Nova

Other Models Include: F 520 Nova, 20" Model

SHAPERS

TI 115 NOVA is the SCM heavy industrial shaper designed for full production workloads ensuring maximum finish quality in the work piece.

TI 115 Nova

Other Shapers Include: TI 110 Nova, TF 130 Class, and TI 155 Class

PLANERS

The SCMI S 520 planer is noise level rated at only 70 decibels making it the quietest planer in its range.

S 520 Nova

Other Models Include: S 630 Nova

SUPERFICI FLAT LINE FINISHING MACHINES

Superfici supplies complete lines and individual machines, which include: Sprayers, Roller Coaters, Curtain Coaters, Brushing Machines, Denibbers, UV Dryers, Stacking Dryers, Flat Dryers, Conveyors, Material Handling, and related equipment.

Individual Spray Unit

Compact Reciprocating Spray Line

CNC MACHINING CENTERS & ROUTERS

"Dollar for dollar" the SCMI Machining Center is the best in the industry. Whether it's nesting or machining, we have the solution to fit your shop.

TECH Z SERIES

The Tech Z Series Models Z25 & Z30 have a full of array of features that make these machines very capable and versatile. With a large drill head, grooving saw and robust electro spindle; just to name a few, the Tech Z is a versatile high performance Point to Point machine for a practical price.

PRATIX N SERIES

The Pratrix N Series is a CNC boring and routing center for nesting operations. The Pratrix N Series has a 4' x 8' or 5' x 12' table and an easy to use, entry level, CNC with a multilayer high-rigidity, phenolic worktable and easy to use vacuum with a patented magnetic system, as well as an electrical cabinet and vacuum pump incorporated into the machine base.

Bags (Standard)

Barrels (Optional)

Dump Bin (Optional)

Quick to install and easy to operate, S-Series dust collectors are the ideal solution for the smaller workshop. **Designed for indoor locations**, S-Series dust collectors can be readily re-located as required. The S-Series comes in 3 models. The S-500 (5hp) The S-750 (7.5hp) and The S-1000 (10hp).

CFM Range: 1,500 to 5,000 CFM

Key features

- Neat, compact, unobtrusive
- Quick and easy to install
- Bag or steel bin dust collection options
- Standard units in three sizes
- One bag size fits all
- Quiet running efficient 1450 RPM fans
- Simple maintenance
- Dantherm QF versatile clip together duct connections

Typical applications

- Woodwork, dust extraction from small and medium workshops
- Mixed workshop applications
- Educational workshops – ceramics, crafts, woodwork

CA, CAM Cyclone Separator

The CA and CAM is a range of ten cyclone separators designed with high efficiency in mind.

The CA type offers an economic solution for normal duty. The CAM is a heavy duty unit to withstand abrasive materials.

Key features

- Robust fully welded steel construction
- Weatherproof for exposed locations
- Normal and heavy duty options
- 10 sizes from 500 to 20000m³/h
- High efficiency up to 90% at 4 micron
- Wide range of options
- Also available in stainless steel or aluminum

Typical applications

- General purpose pre-separation duties
- Heavy duty pre-separation of abrasive materials
- Separation of materials in pneumatic transport systems

NFP Bag Filters

The NFP reverse air, dust collector is suitable for airflows between 1,000 and 9,000 CFM and is available in OPEN or CLOSE panel construction. It also has the option for manual or reverse air cleaning.

CFM Range: 1,000 to 9,000 CFM

Key features

- Modular
- Expandable
- Quiet operation
- Small footprint
- Indoor & outdoor units available
- Bag or barrel material collection

Typical dust control and process applications

- High Speed Routing
- Sawing
- Cutting
- Sanding
- Single 'Cell' Manufacturing
- After-Filters

CS Bag Filters

The CS is a larger, reverse air, dust collector suitable for airflows between 4,000 and 20,000 CFM with various hopper discharge options.

CFM Range: 4,000 to 20,000 CFM

Key features

- Modular
- Expandable
- Customizable range
- Fully automatic operation
- Low profile
- Quiet operation
- No compressed air requirement
- Multiple waste collection options

Typical dust control and process applications

- High Speed Routing
- Cutting
- Centralized Systems

NFK3000 Bag Filters

The NFK3000 filter is a compact filter, well suited for any air flow with heavy material content. It is designed with a basic module size of 1200 x 1200 mm. Additionally, the design makes it possible to add modules if the capacity is increased. The filter is self-supporting with telescopic supporting legs suitable for outdoor locations.

Each module (either 1200 or 2400 mm wide) of the filter construction is fitted with a combined inspection and explosion relief door. Regeneration fans are fitted for easy and effective cleaning of the filter bags. The NFK3000 filter is fitted with the unique patented Dantherm Filtration SUPERBAG filter bag. The filter hopper and the inlet section (optional) separate the particles and distribute the air to the filter bags. The collected material can be removed through a wide range of discharge and waste handling options.

CFM Range: 1,000 to 300,000 CFM

Key features

- Modular galvanized steel construction
- Easy to install on site and extend if required
- ATEX certified for St1 and St2 dust with a Kst value up to 300 bar m/s.
- Available for positive or negative pressure operation
- Low power consumption
- Powerful on-line cleaning by efficient regeneration fans
- Patented polyester SUPERBAG filter bags
- Wide range of discharge and waste handling options

Typical dust control and process applications

- Timber and Wood working machinery
- Furniture production
- Lightweight bulk materials

SCMi LEASING

SCMi Leasing is the answer when financing any capital woodworking machinery. They have over fifteen years experience as a leasing agent. There is very little paperwork and same day approval.

The company is owned and operated under SCM Group North America which is located in Duluth, GA. By being closely oriented with SCM Group North America, SCMi Leasing has a leg up on the competition, due to the available knowledge about the collateral used when applying for leasing.

SCMi leasing is committed to the success of its clients, “Your Success Story Becomes Our Success Story”.

(SEE SCMi LEASING APPLICATION ON PAGE 15)

Leasing Benefits

- 24 hour approval
- No large cash outlay
- Access to competitive interest rates
- Manageable monthly payments
- Payments are tax deductible
- No liabilities on financial statements
- Won't affect your bank line of credit
